

“Give me a fulcrum and a place on which to stand, and I will move the world.”
—Archimedes, Greek Inventor and Mathematician

Hard Headed Headware

Come are the days of the typical appearance of construction hard hats. Hard hats are taking a new turn toward casual. The baseball-cap style is called the Skullerz LED Lighted Bump Cap and features a state-of-the-art shell to protect the skull and brain, along with the comfort and style of a casual cap. The hat also promotes visibility with patented LED lighting technology built in under the brim, and a high-visibility polyester cover with reflective accents. The flanged design of the removable impact-resistant shell promotes air flow and comfort. To learn more about this product or make a purchase, visit www.ergodyne.com.

Crate & Peril

Steel and reinforced concrete inches thick make this shed one to run to in an emergency situation. With multiple locking points, LED battery-powered lights, and a steel door, these sheds can hold up to 16 people with each person having five square feet (0.46 meters²) of space to themselves. Suitable for most any space, these sheds are made for residential and commercial areas and can be placed within two feet of another building. However, it doesn't have to house only people. It is also a good place for chemical storage, server storage, and more. If you are concerned about curb appeal, these sheds come with a stucco exterior in a color of your choice. For more information and purchasing options, visit www.safesheds.com.
